Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-7 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Muller et al of U.S. Patent No. 4,343,884 possessing an issue date of August 10, 1982. Muller et al. disclose of a composition which contains a non-volatile salt of an amine base and a carboxylic acid and a polyhydric alcohol and their partial ethers, (see summary on column 3, lines 27-46). Because the non-volatile salt is a buffer it can readily disassociate to form its reactants, namely the amine base as well as the carboxylic acid.
